

Xaraya 2.0 Brainstorming

Let's try to create a chain of documents like the one John did in Xaraya 2.0 Brainstorming. After a while the common denominators should float to the surface by looking at the whole chain. I tend to view at an application development process like this:

1. make it work
2. make it right
3. make it nice
4. make it fast

For Xaraya, the 1.0 release signals to me we've been able to make it work. Now, let's try to make it right. Some ideas on how follow.
