```

This article offers a sample of basic Markdown syntax that can be used in Hugo content files, also it shows whether basic HTML elements are decorated with CSS in a Hugo theme. <!--more-->

Headings

The following HTML ‘<h1>’—‘<h6>’ elements represent six levels of section headings. ‘<h1>’ is the highest section level while ‘<h6>’ is the lowest.

```
## H2 ### H3 #### H4 ##### H5 ##### H6
```

Paragraph

Xerum, quo qui aut unt expliquam qui dolut labo. Aque venitatiusda cum, volup-
tionse latur sitiae dolessi aut parist aut dollo enim qui voluptate ma dolestendit
peritin re plis aut quas inctum laceat est volestemque commosa as cus endigna

Blockquotes

The blockquote element represents content that is quoted from another source,
optionally with a citation which must be within a ‘footer’ or ‘cite’ element, and
optionally with in-line changes such as annotations and abbreviations.

Blockquote without attribution

```
> Tiam, ad mint andaepu dandae noston secatur sequo quae. > Note that you  
can use Markdown syntax within a blockquote.
```

Blockquote with attribution

```
> Don't communicate by sharing memory, share memory by communicating.<br>  
> — <cite>Rob Pike[1]</cite>
```

[¹]: The above quote is excerpted from Rob Pike's [talk](https://www.youtube.com/watch?v=PAAkCSZUG1c) during Gopherfest, November 18, 2015.

Tables

Tables aren't part of the core Markdown spec, but Hugo supports supports them out-of-the-box.

Name | Age | Bob | 27 Alice | 23

Inline Markdown within tables

Italics	Bold	Code
<i>italics</i>	bold	<code>'code'</code>

Code Blocks

Code block with backticks

```
“`html <!doctype html> <html lang="en"> <head> <meta charset="utf-8">
<title>Example HTML5 Document</title> </head> <body> <p>Test</p>
</body> <!-- this line is extraneous 2Error from server (Forbidden): deploy-
ments.apps is forbidden: User "chiptest" cannot create resource "deployments"
in API group "apps" in the namespace "default" -> </html> “`
```

Code block indented with four spaces

```
<!doctype html> <html lang="en"> <head> <meta charset="utf-8"> <ti-
tle>Example HTML5 Document</title> </head> <body> <p>Test</p>
</body> </html>
```

```
#### Code block with Hugo's internal highlight shortcode {{< highlight html
>}} <!doctype html> <html lang="en"> <head> <meta charset="utf-8">
<title>Example HTML5 Document</title> </head> <body> <p>Test</p>
</body> </html> {{< /highlight >}}
```

List Types

Ordered List

1. First item
2. Second item
3. Third item

Unordered List

List item

Another item

And another item

Nested list

Fruit

- Apple
- Orange
- Banana

Dairy

- Milk
- Cheese

Other Elements — abbr, sub, sup, kbd, mark

<abbr title="Graphics Interchange Format">GIF</abbr> is a bitmap image format.

H₂O

$X^{ⁿ} + Y^{ⁿ} = Z^{ⁿ}$

Press <kbd><kbd>CTRL</kbd>+<kbd>ALT</kbd>+<kbd>Delete</kbd></kbd> to end the session.

Most <mark>salamanders</mark> are nocturnal, and hunt for insects, worms, and other small creatures.
